

SUNFAM

# Innovative Irrigation & Agricultural Solutions

**Capabilities Statement**  
[sunfam.com.au](http://sunfam.com.au)

Since 1988

<p>Sunfam is established in Bundaberg QLD.</p> <h1>1988</h1>		<p>Sunfam is acquired by Elders Limited.</p> <h1>2021</h1>	
	<p>Sunfam unveiled its refreshed brand identity, marking a new chapter.</p> <h1>2026</h1>		

## Sunfam is a leading provider of custom-made irrigation solutions.

We specialise in designing efficient, reliable water systems that support productivity in a wide range of agricultural enterprises, from intensive horticulture to broadacre farming and livestock operations.

Our team uses the latest agritech and decades of industry experience to develop irrigation systems tailored to your environment, water resources and production goals. Whether you're looking to improve water efficiency, increase yields, support pasture growth or modernise ageing infrastructure, Sunfam offers a complete suite of irrigation services and equipment.

## A reputation built over generations

Established in 1988, Sunfam began as a small family business servicing Bundaberg and surrounding districts. With deep industry knowledge and strong on-farm experience, the business grew quickly earning a reputation for high-quality workmanship, reliable delivery, and genuine customer service. Over the decades, Sunfam expanded its capability and successfully delivered projects throughout regional Queensland and even Papua New Guinea.

## Part of the Elders national network

Today, Sunfam employs more than 40 local staff and is a wholly owned business of Elders Rural Services Australia. Through the strength of Elders' national network, Sunfam combines 38+ years of irrigation expertise with the backing of one of the country's most trusted agribusiness brands.

*Whether you're a home owner, grower, pastoralist or mixed-farming enterprise, you can rely on Sunfam to help you make every drop count.*

What we do

# How to deliver water, smarter.

Sunfam assist clients to meet their irrigation and water solution objectives by providing industry knowledge, technical resources and experience to meet their requirements through:

- Consultancy
- Commercial or domestic water solutions
- Design
- Fabrication
- Water meter validation
- Turnkey solutions
- Filtration
- Waste water

# How we deliver water, smarter.

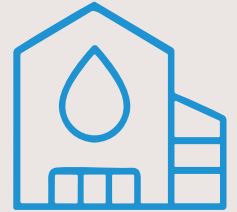

## Consulting

Our consultancy services focus on delivering efficient, tailored water solutions for all agricultural sectors—livestock, horticulture, tree crops and broadacre farming. Whatever your operation, we design systems that maximise performance and reliability.

## Commercial and Domestic

We provide solutions for both commercial and domestic applications. From large-scale livestock enterprises and commercial growers to family farms and home veggie gardens, our team has the expertise and products to keep your project running smoothly; whether it's household UV and water filtration or larger-scale operations.

## Design

Our design team utilises some of the most advanced software available to create detailed concepts for infield irrigation systems, pump stations—both permanent and mobile—and more. We develop clear, practical visual layouts to support full turnkey delivery. Upon project completion, you'll receive comprehensive "As Built" documentation for your records.

## Fabrication

With our Bundaberg-based fabrication facility, we maintain full control over a critical stage of the project. This minimises outsourcing risks and allows rapid adjustments as project needs evolve. We manufacture modular pump stations on frames or skids, assemble them for testing and fitment, then disassemble for transport—reducing time required on-site no matter the destination.

## Turnkey Solutions

If you're unsure where to begin, our qualified and experienced team can manage your entire water project from concept to completion. We provide fully integrated, hassle-free turnkey solutions for any scale or requirement.

## Water Meter Validation

Our trained and certified technicians can inspect, repair or replace water meters to ensure compliance with current legislation and standards, helping you stay accurate and audit-ready.

What we offer

# Your complete Water Solutions Toolkit.

## Interstate Innovative Irrigation Solutions

Building on our specialist consulting, design and fabrication services, Sunfam's commercial and fabrication team can deliver large-scale irrigation projects across Queensland, the Northern Territory and northern New South Wales. We support a diverse range of industries through services such as:

- Infield installations
- Major rural water distribution systems
- Hard-hose irrigators, pivots and linears
- Water meter validations
- Bore pump repairs and condition reporting
- Temporary or permanent pump solutions ranging from 100 L/s to 1200 L/s

Our end-to-end capability means we can design, quote, fabricate and install your project efficiently and accurately. With the right people, processes and tools all in-house, we minimise outsourcing, reduce delays and manage changes in scope quickly.

## In-House Capability, Built for Scale

Our field teams are equipped with a wide range of specialised machinery and tooling—including excavators (1.8T to 14T), trenchers, tractors, trucks, cranes, poly welders, electro fusion gear, bore flow-testing equipment, cameras and more.

All fabrication and welding are completed in our Bundaberg facility by skilled local tradespeople. During peak demand or seasonal pressures, we partner with approved government labour agencies (PALM) to ensure projects stay on schedule and infield capacity remains strong.

We also supply a full range of irrigation equipment, including:

- ➔ Pivot and travelling irrigators
- ➔ Drip irrigation systems
- ➔ Sprinklers
- ➔ Pipes and fittings

## Local Agricultural Solutions

For the Bundaberg region, our retail team supports residential, small commercial and rural customers with an extensive product range; from solar solutions, sprinklers, hoses and pumps to drip tape, spray equipment and travelling irrigators.

Our mobile pump technician provides repairs, servicing, upgrades and UV system installations to keep domestic and rural water moving.

Local growers, farmers and hobbyists can also rely on our rural sales and agronomy teams for crop protection, fertiliser, animal health and general farm supplies.

## Part of the Elders Network

Even if you're outside the Bundaberg region, our retail team can help. As part of the national Elders Rural Services network, Sunfam can connect you with support and solutions across Australia. Whether you're a grower, pastoralist or mixed-farming enterprise, we partner with Elders branches across Australia to make sure you can access the right solution, wherever you are.

## Key supplier

Sunfam partners with a range of trusted, high-quality suppliers across the irrigation industry because we believe that if a job is worth doing, it's worth doing right—first time. We regularly review our supplier network and work only with brands that have strong industry reputations, reliable manufacturing standards and genuine value for money.

We also understand that every customer's needs are different, which is why we can offer cost-conscious options for small home enthusiasts alongside premium solutions for commercial operations.

Some of our key supplier partners include:
