RAIN GAUGE 250mm

Yes it will rain again one day!

DIGITAL TAP TIMER

Water your Garden while you're away!

SOLO 401
1L HAND SPRAYER

Ideal for small areas

DON'T LET YOUR POOL PUMP LET YOU DOWN OVER THE HOLIDAYS

DAVEY SHURFLO POOL PUMPS

Davey SureFlo universal multi-fit swimming pool pump. Retro fits the Onga LTP/PPP pool pumps. No need to alter pipework.

Constructed of strong corrosion resistant and UV stabilised materials for long and reliable working life.

Reliable – Universal, multi-fit and versatile pump that suits multiple applications

Heavy duty, totally enclosed motor protects against the elements for long operating life

Built-in, self-resetting thermal overload protects the motor against damage from over-heating

High quality corrosion resistant Noryl impeller for longer lasting trouble free performance.

Long lasting high performance Viton mechanical seal for long life in pool water.

High Strength 316 stainless steel motor shaft

Fully serviceable, allowing for easy maintenance and repair

Models to suit pools up to 100,000 litres

FROM $495.00

THREE MODELS AVAILABLE:
DSF750
DSF900
DSF1100

DAVEY
Depend on Davey

*all prices include GST and are valid until December 31, 2019

23 Campbell Street
East Bundaberg

Phone: (07) 4152 8339
Fax: (07) 4152 9882

Purchase a 4" x 200m Waterlord or Travelflex hose**
from Sunfam during
December and receive a
$100 Dan Murphy's
gift card

**limited stock

IMPORTANCE OF IRRIGATION AUTOMATION IN MACADAMIA ORCHARDS

In October the Australian Macadamia Society conducted three seperate two-day Tree Water Management Courses in Gympie, Bundaberg, Yaamba and the Northern Rivers. They examined the essential role of water management in irrigated macadamia orchards.

Sunfam Agronomist Dr Dan Manson led the courses. He provided a summary of the major findings from macadamia tree physiology research in Queensland and provided a basic understanding of plant physiology and the tools available for growers to monitor and manage water use for optimum productivity.

The research being conducted by Sunfam in the Queensland macadamia orchards represents a new approach to irrigation management, beginning with an understanding of the plant's water requirements. This is done by measuring the water moving through tree trunks in the orchard using sap flow meters as a tool and the live data is recorded. The analysed data allows us to irrigate trees at the right time of day, and at the right volumes, to minimise stress and maximise productivity.

The benefits of year-round, frequent irrigation applications in Macadamia orchards will help to achieve their yield potential. This highlights the importance of investing in automation to control your irrigation systems.

Contact your local representatives to learn more about the irrigation automation options available at Sunfam.

MAIT Industries

BULLDOCK® 25 EC INSECTICIDE

BULLDOCK 25 EC is the preferred late season treatment to control fruit-spotting bugs in macadamias and advocados.

$560.45/ 20L

BOBCAT I-MAXX

A unique new tool for knockdown and long-term weed management in sugarcane providing outstanding performance against key grass and broadleaf weeds.

$566.83/ 5kg

*all prices include GST and are valid until December 31, 2019
