

## McNAUGHT RETRACTABLE HOSE REEL

- Suitable for Ag Chemicals
- 150psi 16m 3/8" hose
- Swivel Mount

**\$310.00\***

## ASSORTED SPRAY GUNS

**FOR ALL APPLICATIONS**

From  
**\$31.00\***

## PURETEC BORESAFE

Easy to apply biodegradable chemical to break down the iron build up in bores, bore pump and pipework.

5kg \$86.00

20kg \$295.00

## DAVEY FIREFIGHTER

# ARE YOU READY FOR THIS BUSHFIRE SEASON?

A fire plan is the first step to ensuring you are on the way to being bushfire ready. The second step is to ensure you, your equipment and your home are protected.

You need an engine powered pump for both asset protection as well as post fire management of burning fences, surrounding vegetation and other structures including buildings.

We manufacture our world-famous Firefighter pump ends in Melbourne and fit them to quality petrol engines from Honda and Briggs & Stratton or diesel engines from Yanmar.

If you already own a Davey Firefighter, there are some simple, but important steps you need to take to get your pump ready for the coming season.

See reverse for a list of recommendations for effective management and maintenance for Firefighter owners.

**REMOTE START FIREFIGHTER MODELS**  
Australia's favourite pump, now with remote start and stop remotely with your phone perfect for ultimate peace-of-mind asset protection

# GET READY...

Few people are ever fully prepared for an emergency like a bush fire outbreak and the speed at which a fire front can travel. Consequently they often allow little time to implement an effective fire defence.

Davey has a list of recommendations for effective management and maintenance for consumers, ahead of the fire season.

If you would like a copy of these recommendations please ask one of our friendly staff

## SUNFAM AGRONOMY DEPARTMENT TALK WITH DAN AND SANDEEP

### POWDERY MILDEW

Powdery Mildew is the most common disease occurring in small crops grown in Bundaberg. It has become a growing issue especially in cucurbit crops such as zucchini, pumpkin, melons, cucumbers, squash etc.

Typical symptoms are white/grey powdery lesions on the leaf surface that eventually turn brown and drop off, refer images right. Dry, humid conditions favour disease infection and can be easily/quickly spread by wind.

Once infected, the pathogen feeds on nutrients from the plant and reduces photosynthesis activity resulting in poor quality of produce, reduced marketable yield and short crop life.

For effective management of powdery mildew, a good spray program is the key and also factors like timing and coverage should be considered.

Growers have a wide range of products to choose from for powdery mildew management. Fontelis, Flute, Kusabi, Amistar, Vivando, Talendo, Nimrod, Collis and Bayfidan are widely used chemicals for powdery mildew management.

Growers are recommended to use these products as preventive sprays rather than curative because under high disease pressure, fungicide sprays can be unsuccessful.

For more friendly, helpful Agronomy advice, talk to Dan or Sandeep.

## FIELDQUIP

...a cut above the rest!

### SINGLE SPINDLE 400 SERIES

#### FEATURES -

Reinforced domed deck design to minimise material buildup, allow faster cleaning and provide greater strength.

Full length and width deck bracing provides structural integrity for durability and long life.

Streamlined bracing under the deck maintains material flow through the cutting chamber.

114mm diameter cut capacity to handle heavy mowing applications easily.

210 HP Gearbox rating (based on field performance) with 5 year Limited Warranty.

Deep deck design to handle higher volumes of cut material.

6mm x 279mm side skirts with 13mm thick material at the Impact Zone to handle extra abuse.

Cross braced round pan blade carrier provides excellent durability in heavy mowing applications.

The pan blade carrier overlaps the gearbox output shaft seal to protect it from cut material.

High blade tip speeds provide a clean cut and performance in heavy mowing applications.
