Nut Grass Control

TEMPRA HERBICIDE

For the control of nutgrass in sugarcane, sorghum and turf. Available in various sizes:

500g - \$215.00

100g - \$59.00

25g - \$27.00

Felco Pruning Saws

Swiss Precision. Made to Last.

From
\$46.00*

Garden Hose

ALL ROUNDER 2

10 year guarantee

Kink resistant

From
\$36.00*

12mm & 18mm widths

Available in 12m, 18m & 100m rolls

The 2088 Series diaphragm pumps deliver reliable performance of **11.3 lpm @ 45 psi** making them ideal for small booms and liquid fertiliser applications.

\$289.00*

SHURflo®

The 8000 Series diaphragm pump is Shurflo's most widely used agriculture pump. Viton valve material and santoprene diaphragms assures maximum chemical resistance.

6.8 lpm with 60psi pressure switch.

\$210.00*

McNAUGHT Retractable Hose Reel

Suitable for Ag Chem up to 250psi

10mm x 16m

\$295.00*

RAPID SPRAY Tow Behind Spreader

- 14" tyres
- 11 settings
for seed or
fertiliser

\$799.00*

PURETEC BoreSafe

Easy to apply, biodegradable chemical to break down the iron build up in bores, bore pump and pipework.

\$86.00*
5kg

\$295.00*
20kg

\$73/Ha*

Bobcat® i-MAXX SG

Bobcat i-MAXX SG herbicide provides long-lasting, broad spectrum control of key grasses and broadleaf weeds in plant and ratoon cane.

Mode of Action

GROUP B | C HERBICIDE

Bobcat i-MAXX SG is a co formulation of hexazinone (Group C) and imazapic (Group B).

Ideal rotation option

It is important that growers use a range of management strategies to control weeds, and rotating modes of action is a key part of this strategy. Rotating herbicide mode of action groups reduces selection pressure for herbicide resistance.

At a glance

Long-lasting, broad spectrum weed control

Controls a range of key grasses and broadleaf weeds in plant and ratoon cane for up to three months.

Flexible timing

Wide application window with no time-of-year application restrictions.

Convenient formulation

Water soluble granule formulation combines two active ingredients into the one one, easy-to-use formulation, reducing the need to tank mix to broaden the weed spectrum.

Weeds Controlled

Awnless barnyard grass, barnyard grass, blackberry nightshade, blue billygoat weed, calopo vine, common side, giant/black pigweed, glossy nightshade, green amaranth, green summer grass, Ipomoea spp., guinea grass, liverseed grass, milkweed (Mexican fire plant), pigweed, sowthistle, summergrass.

Application Timing

Bobcat i-MAXX SG can be applied as a post-emergent directed spray in plant or ratoon cane or as a post-harvest spray prior to weed or cane emergence in ratoon cane.

SIVANTO
prime

SIVANTO® prime is an innovative insecticide which has been developed worldwide in a *wide variety of fruit and vegetable crops*. With over a decade of field research in Australia, it has shown excellent performance on a wide spectrum of damaging sucking pests including fruit spotting bugs, banana spotting bugs, lace bugs, aphids, whiteflies, planthoppers and for the suppression of scirtothrips. It acts fast and selectively; meeting the needs in most cases of a beneficial species safe insecticide and diverse environmental safety requirements *in a range of crops*.

SILVERLEAF WHITEFLY

FRUIT SPOTTING BUGS

LACE BUGS

SCIRTOTHRIPS

APHIDS

PLANTHOPPERS

KOCIDE® BLUE XTRA

Kocide Blue Xtra (350g/kg copper (Cu) present as Cupric hydroxide) is an easy to use copper fungicide for protection against fungal and bacterial diseases in fruits, vegetables and many other crops.

Kocide Blue Xtra controls a wide range of fruit and vegetable diseases such as; Anthracnose in avocados, macadamias and mangoes. Phytophthora stem canker in avocados, citrus and macadamias. Black Spot, Melanose, Smoky Blotch and scab in citrus crops. Parasite algae in lychees. Husk Spot in macadamias. Bacterial black spot in mangoes.

Kocide Blue Xtra can also be applied to capsicums, cucurbits and tomatoes for a range of disease control such as common blight and halo blight.
