Serenade® SOIL ACTIV

Active Ingredient - *Bacillus amyloliquefaciens* strain QST 713

Pack Size 5lt
\$412.26 inc GST &
drum muster

Serenade® SOIL ACTIV is a new soil optimised addition to the Serenade family. Formulated to achieve a faster superior colonisation of plant roots and **improved early root development, nutrient uptake and root architecture**, to take crop production to the next level. Serenade SOIL ACTIV is organically certified (ACO and OMRI).

It replaces Serenade Prime and is 5 x the concentrate.

TRIVOR®

Trivor® provides rapid knockdown and extended residual control of Fruit & Banana Spotting bug, mealy bugs and scale in **macadamias, avocados and mangoes** and the suppression of fruit flies in avocados, citrus and mangoes.

Trivor® is a combination of Group 4A and Group 7C insecticides and as such incorporates two distinctly different Modes of Action, setting a new benchmark in knockdown control and longer-term protection and with its low use rates, it displays minimal impact on beneficial insects.

Key Features :

- Two highly effective and trusted active ingredients - Acetamiprid and Pyriproxyfen combine to provide protection from key sucking pests and hard and soft scale species
- Rapid knockdown action combined with long residual protection
- Highly compatible dispersible concentrate formulation allowing one pass insect and disease control when mixed with registered fungicides
- Two modes of action for resistance management.

SEASOL 20L

Seasol encourages vigorous, healthy plant growth with enhanced flowering and root system development, as well as improved natural plant tolerance to heat, drought, frost, pests and diseases.
